

Plug-In TPMS –Make your GPS and DVD smarter!

Has Been Brought To You by Orange Electronic

Can you imagine your GPS navigator is not only a normal one like others? Or you want to buy GPS navigator and TPMS retrofit but cannot afford them at the same time. When you face this question, how do you resolve it? All you need is Orange Plug-in TPMS. Why? Let's check out of the following.

PND is merely a PND?

Currently, PND and DVD machines can offer you convenient and easy way to guide you to destinations. They put various and plenty of information in your PND and DVD machine. Yes, it really helps you to get a way to your destination. When most people enjoy the convenience that has been brought by PND and GPS, don't forget to care about your driving safety!

Why you need TPMS?

According to NHTSA, the number of people who injure in blow-up accidents is 8400 annually. Blow-up accidents occupied around 75% of tire accidents. Who give you the protection away from blow-up accidents? The obvious answer is TPMS. After mandatory installation TPMS in all passenger vehicles on the roads, the casualty has dropped down dramatically.

Orange TPMS enhance the safety!

Orange TPMS has released break-through innovation- **Plug-in TPMS**. In the future, when you purchase GPS navigator products which are compatible with Orange TPMS, you don't have to put GPS and TPMS display on your dashboard at the same time. All you have to do is connect TPMS receiver via Mini-USB cord to PND navigator. Tire pressures of your vehicle will be continuously 24 hours monitored by Orange Plug-in TPMS. Tire pressure information will be sent from Plug-in TPMS receiver unit to GPS machine and then be displayed on GPS screen. When your tire pressures are within safety range, PND doesn't have to show your tire pressures. Once your tire pressure is abnormal, the warning of tire pressure will pop-up and give you alarm to remind you on the screen of GPS or DVD

Benefit for you

The best part is about the price that Orange saves for you. Since Plug-in TPMS can share its display unit with PND or DVD machines. Consumers can save their cost a lot than retrofit price with display unit. We believe that Plug-In TPMS will soon create a new and hot topic in GPS and TPMS markets. If you really

consider TPMS just TPMS or GPS is only GPS, Orange will change your view to TPMS.

Toward to the Future

Orange always thinks much more than others but also gives you more than others do! Orange has created many fabulous achievements that led in this industry and markets. From OE replacement sensors to ID programmer, we always play a role as a pioneer in this field. We aggressively pursue the creativity and innovation with passion toward to the future.
